

Introduction to Programming

High Distinction Task 3.2: Video Presentation

Overview

This video presentation is to allow you to showcase your program or project and to highlight the difficulties you faced.

- Purpose:** Demonstrate that you have reached a D or HD grade level and to showcase your work.
- Task:** Produce a video that describes your project what motivated it, what you did and any results you obtained.
- Time:** This task should be completed before due date for your portfolio. See the unit outline for details.
- Resources:** ■ Programming Arcana, code-cast videos.

Note: If you are not currently up to date you should skip this task and return to it once you are up to date with the Pass Tasks. Do not allow Distinction Tasks to delay you in keeping up with the unit's Pass Tasks.

Submission Details

You must submit the following files to Doubtfire:

- This video is in addition to – or as well as – your custom code video.
- A file with a link to your video. This file must be uploaded to a web-site address which your lecturers will give you late in semester once you have booked your interview.

Instructions

Your video should be no longer than 3 minutes – it may be added to the end of your custom code video or a separate video (we recommend a separate video). It should address the criteria in the marking rubric for this task (see the unit's Blackboard site).
